

Product Information

B & D Vitamin

What it is:

- A premix containing vitamins, trace and base minerals for building ruminant rations
- Contains 2,100,000 IU/lb of vitamin A, 450,000 IU/lb of vitamin D, and 4,000 IU/lb of vitamin E when fed at the rate of 0.025 per head per day
- Provides nutrition necessary for growing cattle
- Use with salt and protein to make supplements to build complete feeds
- Particularly well-suited to feed growing cattle using hay or silage and hay combinations.

How it is used:

- Mix at the rate of 0.025 pounds per head per day. For supplement fed at 1 pound per head per day mix 50 pounds of B & D Vitamin with 1950 of other feed ingredients.
- If urea is used as a source of NPN, it is recommended that 25 pounds of OCM be added per ton.

WARNING: DO NOT FEED TO SHEEP
