

Product Information

CitriStim[®]

What it is:

- A trademarked yeast mannan product that can be used in all life stages and classes of livestock, equine, poultry, and aquaculture to lower counts of pathogenic bacteria including E. coli, Salmonella, Proteus, Klebsiella, and Clostridium.
- Yeast mannans provide conditioning for gut immunity by raising immune signaling and recruiting macrophages and other immune cells to the intestine to counter anticipate pathogenic challenges.

How it is used:

- For specific feeding recommendations, contact your trusted nutrition consultant
