

Product Information

DigestaMax 4 for Beef Cattle

What it is:

- A combination of four all natural components to improve the entire digestive system:
 - Diamond V XP Yeast Culture™ to improve palatability, stimulate rumen function and enhance digestibility
 - Live Probiotic Bacteria:
 - Propionibacterium to promote rumen function and consistent intake
 - Lactobacillus acidophilus, Lactobacillus casei, Lactobacillus lactis, Enterococcus faecium, Pediococcus cerevisiae, Bacillus subtilis, Bacillus licheniformis to refine the gut environment, maximize nutrient availability and maintain proper nutrient absorption
 - Enzymes
 - Alpha-amylase, Protease, Cellulase, Hemicellulase, Pectinase, Beta-glucanase, and Lipase to optimize digestive performance
 - Aspergillus Oryzae Fermentation Culture to supply viable mycelia and spores, provide active enzymes, and stimulate rumen function

How it is used:

- Mix or top dress to provide the following daily intakes:
 - Receiving/starting diets: 2 ounces per head per day
 - Growing/finishing cattle: 1 ounce per head per day
 - Sick pens: 2 ounces per head per day
 - Show cattle: 2 ounces per head per day
