

Product Information

Dry Cow Base Mix- LP-2

What it is:

- A high quality, balanced base mix for dry cows and springing heifers when the forages are primarily grass hay and corn silage
- Reduces metabolic disorders, improves animal health after calving, supports tissue growth, replaces nutrients lost during lactation, supports proper immune function
- Contains 16% calcium, 8% phosphorous
- Contains 600,000 IU/lb vitamin A; 200,000 IU/lb vitamin D; 4,000 IU/lb vitamin E per head per day
- Contains highly available trace minerals including selenium
- Contains no salt

How it is used:

- Feed or mix at a rate of 4 ounces per head per day throughout the dry period
- Offer white salt blocks and fresh water throughout the dry period

WARNING: DO NOT FEED TO SHEEP
