

Product Information

FQ 11-6-25 Mineral

What it is:

- A high calcium, highly fortified mixing mineral
- Contains 20% calcium and 5% phosphorous, a Ca:P ratio of 4:1
- Ideal for high grain diets that are low in calcium and high in phosphorous
- Contains 120,000 IU per pound of stabilized vitamin A, 30,000 IU of vitamin D3, and 135 IU of vitamin E
- Provides 3 mg of added selenium per 4 ounces
- Contains well balanced trace mineral fortification which makes it an ideal mixing mineral for feedlot situations
- Contains no added salt

How it is used:

- Use when cattle are being fed a high grain ration that requires a high level of supplemental calcium and a relatively small level of supplemental phosphorous
- Mixing into a supplemental or grain ration to provide from 3.0 to 6.0 ounces per head per day

Choices of Additives:

- Chlortetracycline 4000 grams per ton
- Chlortetracycline 8000 grams per ton
- Lasalocid (Bovatec) 1600 grams per ton
- S-Methoprene (IGR)

WARNING: DO NOT FEED TO SHEEP
