

Product Information

OCM Global

What it is:

- A blend of free-flowing, non-medicated, hydrated minerals
- A source of magnesium and potassium
- A source of sulfur
- An effective laxative for livestock without causing dehydration
- An effective rumen buffer
- Does not contain bulk forming ingredients

When it is used:

- To help maintain consistent and high feed intake to optimize livestock performance
- To buffer the digestive system and help maintain normal feed passage throughout the digestive tract
- To help restore normal feed intake which can be affected by birthing, acidosis, constipation high grain rations, etc.
- To help rid the digestive system of excessive mucus caused by an intestinal infection, internal parasites or stress
- To help provide a better environment in the farrowing crate by allowing the sow/s manure to easily drop through the flooring

How it is used:

- May be fed to all livestock and with any nutritional program.
- Adjust OCM Global feeding level to produce desired stool consistency.
- Do not feed as a sole source of minerals.
