

Product Information

Pro-Bio Plus

What it is:

- A source of live (viable) naturally occurring lactic acid producing bacteria, live yeast, and yeast culture for lactating, non-lactating and growing dairy cattle along with beef cattle, swine, poultry and horses.
- Benefits include supporting optimum dry matter intake; supports correct rumen function; supports proper reproductive and immune function.
- Contains 40 billion CFU/lb of enterococcus faecium strains of live naturally occurring micro organisms
- High levels of chelated zinc, manganese and copper
- Contains B vitamins along with vitamins A, D, and E and yeast culture

How it is used:

- Dairy Cattle: Feed 2 oz per cow per day first 120 days of lactation
- Beef Cattle: Feed 2 oz per head per day first 4 days. Feed 1 oz per head per day for the remainder of receiving period
- Calves: 12.5 pounds per ton of complete calf starter diet
- Swine:
 - Starter (15-40 lbs): Mix 25 lbs per ton
 - Growers (40-100 lbs): Mix 12.5 lbs per ton
 - Finishers (100-mkt): Mix 6.25 lbs per ton
 - Sows & Gilts: Feed 1 oz per head per day or 12.5 lbs per ton
- Horses: Feed 2 oz per head per day
- Poultry: 2.5 lbs per ton of complete feed

WARNING: DO NOT FEED TO SHEEP
